A.E.G. Automatic Electric Gun

TR4 / TR15 / TR16

MANUAL

- ⚠ All products employ a high precision 6.04mm barrel. Using 5.95mm BB pellets is highly recommended. Damage to the product due to by faulty BB pellets voids the warranty. Use with caution.
- ⚠ The buyer and the user of this product shall adhere to all local laws regulating the usage and the ownership of airsoft guns.

You may be liable for damaging public, personal property, or for injuring a person or an animal. Always observe good manners and enjoy fun sport shooting.

Safety procedures:
 1. Attach the safety cap to the muzzle.
 2. Set the selector lever to the safety position.
 3. Remove the magazine.

When shooting the air guns for target practice or in a game situation, you and all participants must wear safety goggles or other eye protective gear. Please pay attention to ricochets and third parties around you.

- ⚠ This product is intended for users 18 years or older.
- ⚠ Read all instructions before using this product.
- ⚠ Adult supervision required.
- ⚠ Always wear safety goggles when using this product.
- ⚠ Misuse or careless handling of this product may cause injury.
- ⚠ May be hazardous up to 50 meters.

When you carry the air gun, attach the safety cap, set the selector lever to the safety position, and always put the air gun in a case or bag.

Select a safe place for operating the air gun and avoid places where people and cars are around.

Always attach the safety cap to the muzzle, remove the battery and store the air gun in a case or bag and at a place that is out of reach of children.

Orange tip disclaimer :

- ⚠ All G&G Airsoft guns come with a permanent fixed orange tip required by law, which will grant Airsoft legal usage in the United States.
- ⚠ If you alter, modify, abuse or remove the orange tip, all warranty coverage will be void.

Never direct the muzzle towards a person, animal, or in any direction that may cause harm or damage to a third party.

Looking into the muzzle is extremely dangerous, regardless of having BB's loaded or not. If you get hit in the eye by a BB pellet, worst case scenario, you may lose your eye sight.

There may be cases where some BB's remain in the gun after the magazine has been removed. After removal of the magazine, direct the muzzle towards a safe direction and pull the trigger to confirm that there are no BB's remaining in the gun, then attach the safety cap.

For more product information please visit our website
www.guay2.com

Make sure to put the barrel and safety cap onto the muzzle except when shooting, to prevent any accidents, discharge of BB's, and also for dust protection purposes. Never pull the trigger while the barrel and safety cap are attached.

Activating the trigger carelessly is extremely dangerous. Never put your finger on the trigger unless the safety cap is removed and you are ready to shoot a target.

Disassembling or modifying the gun may adversely affect the performance and make it dangerous. It would also void all warranty.

Blow Back Pneumatic System

True to the faith of mimicking real life firearms, G&G is proud to present its new Pneumatic Blow Back system to its line of airsoft guns. Conventional airsoft blow back utilizes tow hook springs to mimic real life bolt actions, which often lead to excess wear, tear, and poor reliability in the gear box. To alleviate the problem of conventional systems, G&G has independently developed the Pneumatic Blow Back system; a piston driven and gas operated mechanism to better mimic real life bolt actions.

This new technology utilizes compressed air to move the bolt, which enables the action without adding extra stress to the gear box.

This class leading system represents a significant milestone in the airsoft industry.

Selector & Safety

Warning

- ▶ Never operate the selector switch while pulling the trigger. Otherwise, malfunctions may occur.
- ▶ Pulling the trigger with the Selector being set at safe mode may damage the air gun.

Always set the safety mode setting immediately after firing.

Safety Setting Mode

The trigger cannot be pulled

When the gun is in storage or not being fired, always set the selector to the Safe position and attach the protective cap on the muzzle.

Semi Mode

Single shot

The gun will fire one shot each time when pulling the trigger.

Fully Automatic Mode

Automatic firing

The gun will fire continuously while the trigger remains pulled.

Warning

- ▶ Use only the G&G battery purchased from your local dealer.

Installing the Battery

For Fixed Stock Version

TR16 A2 / A3 / A3 Carbine / R4 / R5

Lower the stock plate nail and open the cover.

Connect the connector until you hear a 'click', then insert the battery into the fixed stock.

Close the battery cover.

For Handguard Version

TR16 Carbine / A2 Carbine

TR4 CQB H

Pull the delta ring and hold. Remove the lower handguard.

Set the battery beside the outer barrel. Connect the battery plug with the connector until you hear a 'click'.

Hold the battery and pull the delta ring. Remove the lower handguard.

Warning

► Use only the G&G battery purchased from your local dealer.

Installing the Battery

For Extended Battery Stock Version

TR16 CQW

TR15 Series

TR4 CQB R / TR4 CQB S

1. Push the stock release lever.
2. Pull the stock to the last position.

1. Pull and hold the stock release lever mount.
2. Pull out the stock.

Turn and take off the battery cover.

For Extended Battery Stock Version

TR16 CQW

TR15 Series

TR4 CQB R / TR4 CQB S

Insert the battery into the stock.

Connect the battery plug into the connector until you hear a 'click'.

Reinstall the stock.

Warning

► Use only the G&G battery purchased from your local dealer.

Installing the Battery

For Ready Magazine Version

TR16 R4 Carbine / CRW

Pull out the connector.

Connect the battery plug with the connector until you hear a 'click'.

Insert into upper receiver and connect firmly until you hear a 'click'.

For Patriot Battery Stock Version

TR16 CRW Cannon / CRW Viper

Release the battery stock.

Connect the battery plug with the connector until you hear a 'click'.

1. Insert the battery into the stock.
2. Lock the stock.

Warning

- Make sure not to lose the adjustment tool.

Front sight adjustment

For front sight up-down adjustment.
Turning clockwise : Raises the pellet hitting point.
Turning counterclockwise : Lowers the pellet hitting point.

Precision targeting

Battle sight
(For common shooting)
Used for full automatic firing.

Battle sight
(For special shooting)
Used for precision firing.

Windage adjustment knob

Turning the windage adjustment dial will move the pellet hitting point to the left or right.

For left-right adjustment.
Turning clockwise :
Shifts the pellet hitting point to the right.
Turning counterclockwise :
Shifts the pellet hitting point to the left.

Up-down adjustment

Turning the dial UP
will raise the pellet
hitting point.

Turning the dial DOWN
will lower the pellet
hitting point.

Raises the pellet hitting point.

Sight Adjustment

Warning

- Be careful not to catch your fingers in the dummy bolt.

Open the port cover

1. The Charging handle can be pulled and the bolt will be fastened.
2. Pulling the charging handle will take the bolt back and open the port cover. **This function is only for the plastic/blow back version**

Hop-up adjustment

Turn the hop-up for a desired flight pattern of the BB pellet.
The hop-up dial can be turned to a certain degree.
Turning it too much will damage the unit.

Warning

- Never hold the gun sideways as the BB pellets will curve right or left due to the hop-up system.

Warning

► Only adjust if the gear noise becomes shrilly.

Movable Parts

Depress the Trigger Guard

Depress the trigger guard plunger with a proper tool and open the trigger guard.

Motor Adjustment

The motor adjustable screw is at the bottom of the grip. Use a screwdriver to adjust.

Forward Grip Setting

Set the forward grip on the rail.

Move the forward grip to adjust position.

Fasten the knob.

Movable Parts

Installing the Carrying Handle

Connect the detachable carrying handle with the upper receiver.

Fasten the interface knob.

Finish.

Installing the Rear Sight

Put on the detachable rear sight on the upper receiver.

Fasten the interface knob.

Finish.

Movable Parts

Q.D. Sling Swivel Setting

Put on Q.D.sling swivel mount on the rail.
Fasten the screw.

Install the Q.D.sling swivel on the Q.D.sling
swivel mount.

Install the Q.D. sling swivel on the SOPMOD
tactical stock.

Rail Handguard Panels Setting

Set the forward grip on the rail.

Slide in the rail handguard panels.

Finish.

Movable Parts

Removing the Handguard

Pull the delta ring.

Remove the lower handguard.

Remove the upper handguard.

Retractable Stock

Push the release lever to unlock.

Pull the stock.

Adjust the position of the stock.
(6 positions)

- Warning**
- Make sure to set the magazine upwards. It is securely installed with you hear a 'click'.
 - Confirm that the safety lever is set to Safety position and do not place your finger on the trigger.

Magazine Setting

Magazine Setting

Open the magazine cover.

Load G&G 5.95mm BB pellets into the magazine. The magazine is capable of holding approximately 450 pellets.

After the BB pellets have been loaded, close the cover and turn the gear on the bottom until the sound changes.

Magazine Setting

Insert the magazine into the body until you hear a 'click'.

To Release the Magazine

Press the magazine release.

Pull the magazine out of the receiver.

- Warning**
- Select a safe place for operating the air gun.
 - Never put your finger on the bolt when operating the air gun.

Firing

Firing

Make sure to install the magazine upwards and into the body. It is installed properly when you hear a 'click'.

Remove the protective cap only when you are ready to fire the gun.

Set the Selector Lever to Semi or Full Auto.

After Operation

- Remove the magazine and fire at a safe direction for 2-3 seconds. Push the forward assist knob to release the spring and have the selector set into safety mode. Make sure that the barrel is empty.
- Always disconnect the battery and attach the protective cap whenever you do not operate the air gun.

Cautions On Motor & Battery

- Charge the battery if the firing cycle becomes slow.
- Stop using the air gun for 5-10 minutes after firing around 500 rounds in order to ensure a longer life of the motor and battery.

Maintenance

Warning

- ▶ Make sure no dirt gets into the chamber to avoid clogging of pellets.
- ▶ Hop-up may be unstable for 200 to 300 rounds after using silicone oil. This is the normal operation of the gun.
- ▶ Never use CRC-556, WD40, or other corrosive lubricants.

Maintenance When Pellet Speed Becomes Low

1. Place a few drops of silicone oil or teflon oil into the pellet entrance. After inserting BB pellets into the magazine, fire the gun for up to 200~300 pellets.
2. To complete the cleaning, use the cleaning rod (with cotton) to remove excess oil.

Warning

- ▶ Do not jam the cleaning rod into the barrel by force.
- ▶ Should the BB's remains inside the barrel, point the gun towards a safe direction and discharge any loosened BB's in semi-automatic mode.

Removing Clogged Pellets

1. Return the hop-up dial to the Normal position and insert the cleaning rod from the lead edge of the barrel.
2. To remove clogged BB's, carefully insert the cleaning rod inside with the flat tip facing down as shown below.

Troubleshooting

SYMPTOM	POTENTIAL	CORRECTIVE
No operation at all	Selector lever is set to safety.	Set the selector lever to Semi or Full Auto.
	Battery is not charged.	Charge the battery.
	Battery connector is disconnected.	Connect the connector.
	The + and - of battery connector is reversed.	Switch the batteries to the correct position.
	Expired motor life (50,000 to 60,000 rounds) or poor electrical connection.	Replace the dead motor (can be purchased from local dealer or directly from G&G). Check and repair the contacts.
Although motor is revolving, no pellet can be fired	Pellets are clogged inside the magazine.	Insert the charging rod into the magazine and move up and down a few times to remove clogged pellets.
	Pellets are clogged in the chamber.	Remove clogged pellets using the cleaning rod.
Impossible full-auto operation(automatic firing)	Faulty gear.	Purchase the replacement gear from your dealer or G&G and repair.
	Insufficient battery power.	Charge the battery.
	Faulty pellet feed of magazine.	Repair clogging of the magazine.
	Poor electrical connection.	Consult your dealer or G&G for overhaul maintenance or repair.
Shooting distance becomes shorter	Damaged or worn chamber set.	Replace the replacement parts (purchase from your dealer or G&G)
	Damaged or worn piston set (O-ring,piston spring)	
	Something is jammed in the inner barrel	Use the cleaning rod and clean the inner barrel.
	Faulty BB pellets (too small or heavy)	Use the genuine G&G Pellets.
	Shortage of silicone oil	Place a few drops of silicone oil onto the upper chamber.
Too loud operating noise	Gear problem caused by too many blank firing	Consult your dealer or G&G for overhaul maintenance, part replacement (gear,etc.) or repair.
	Worn or damaged gear	
Pellets being fallen out from barrel end	Gear problem caused by too many blank firing	Turn the hop adjustment lever toward Hop.
	Damaged or worn chamber set.	
	No hop setting.	Use the G&G Pellets.
If gun gets wet	Faulty BB Pellets (too small or heavy)	Stop operation immediately, disconnect the battery, wipe off water from inside the main body and the battery. After the gun is completely dry, carry out trial firing. If the unit is not operational, please contact your local dealer for repair.
